# MODERN ON THE MARSH

## SITUATION OVERVIEW

Situated on the edge of a large marsh in an area with few trees, this modern home's simple design features spacious open areas inside and out. Gable rooflines and farmhouse height walls are in keeping with the heritage of Cape Elizabeth, Maine, where this home is located. Sleek, clean Integrity All Ultrex® windows were the ideal choice to help create an open floor plan for today's contemporary taste. The homeowners described their new residence as crisp, contemporary, innovative, simple, minimalist and energy efficient.

## INTEGRITY SOLUTION

The goal for this home is comfort...comfort from the energy efficiency and stylish aesthetics of the windows and doors and comfort with the project's budget. Integrity's All Ultrex windows found a comforting place in the middle of the pack of other competitors' styles and prices, which allowed the creative design ideas to flow. And with one of the best rough opening to day light ratios in the industry, Integrity's All Ultrex windows beautifully met the demand for the openness the homeowner was hoping to achieve.

### Integrity windows and doors are built tougher, last longer and protect better.

- Because Ultrex is 8x stronger than vinyl, Integrity can offer an expansive line of contemporary design styles that feature maximum light and clean sight lines with narrow profiles.\*
- Integrity products are ENERGY STAR® certified. Integrity windows and doors meet the highest energy-efficiency standards, which makes them ideal for providing energy savings and reducing the environmental impact.\*\*
- Ultrex pultruded fiberglass has virtually all the desirable characteristics a material used to make windows and doors could have. It's strong, rigid, heat resistant and non-corrosive. It also has minimal thermal expansion/contraction and low conductivity for superior energy efficiency.
- Integrity was born from The Marvin® Companies' century-long heritage of service, innovation, craftsmanship, quality and value with a focus on all-out performance.
