Sheet of 4	Corner gasket	11869519
1 each	24– #9 x 3″ Torx head screw 1 – T25 Torx bit (Used for units wider than CN68 or higher than CN78)	11869260
1 each	Structural installation instructions	11970019

YOU WILL NEED TO SUPPLY	
Safety glasses	Cordless drill
Square head bit	Sealant

1. Remove packaging materials, staples and shipping blocks, if any, attached to the exterior frame of the unit.

2. For units with sash shipped separately where a jamb screw method is used, install frame now. Follow instructions supplied with window. Secure the frame into the opening with screws through the center of jamb per the supplied structural installation instructions. See figure 1.

3. Apply a nickel sized dollop of sealant at the corner of the sill and a bead of sealant along the sill as shown in figure 2.
